Design

Infographics

Infographics for visual storytelling studies, created in InDesign.

Digitized Drawings

Digitized versions of a friend’s dinosaur cartoon character drawings. Manually traced and colored in Inkscape.

Smith College Pride Logos

LGBTQ+ pride versions of the Smith College logos, created for a Pride Parade t-shirt design contest. Illustrated using Inkscape and CorelDraw.

Short Story Title Illustrations

Freelance illustration work for Paper Republic, a nonprofit promoting Chinese literature in translation.

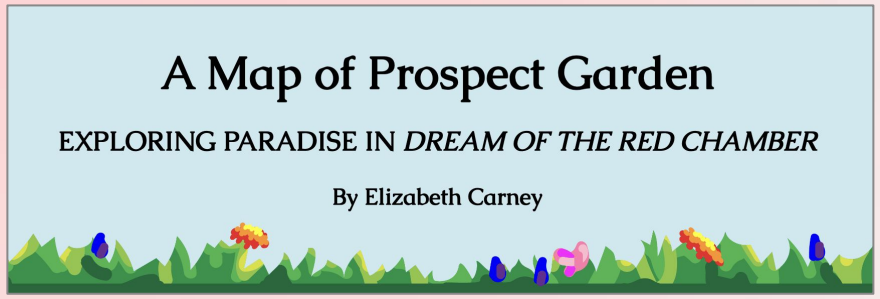

- Concepts designed from themes in the short stories
- Created in InkScape

Programming

A Map of Prospect Garden

view ↗

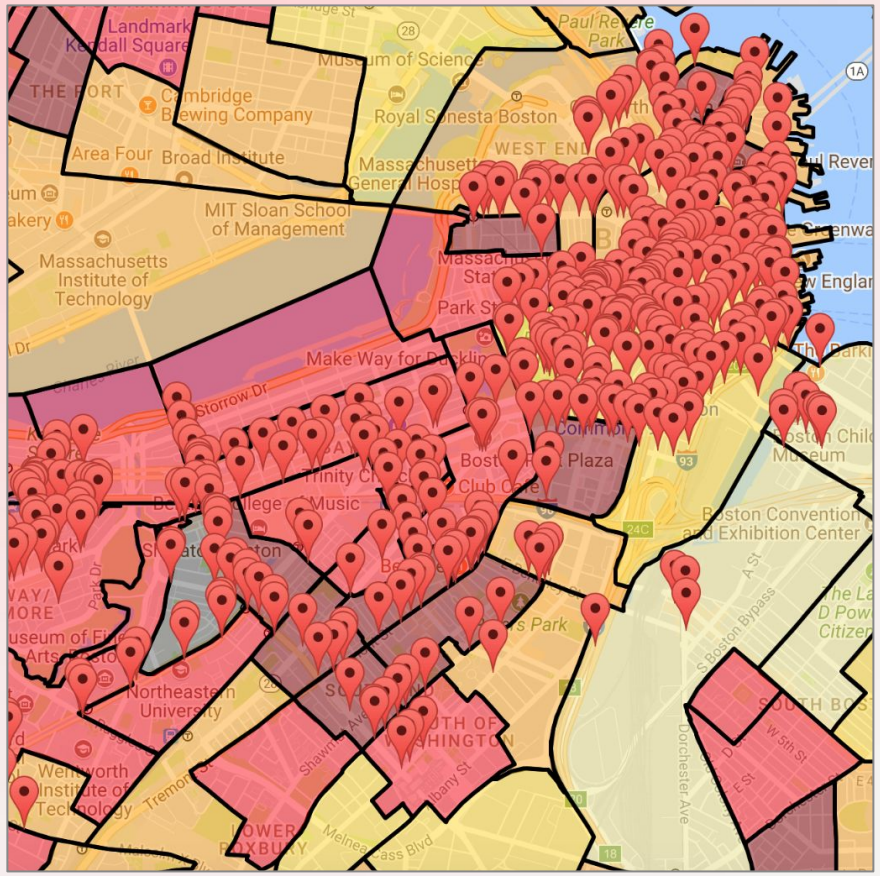

An interactive online map of Prospect Garden (大观园) from *Dream of the Red Chamber* (《红楼梦》), a renowned Chinese classical novel.

- Built with HTML/CSS/JS
- Modal divs with info and visuals
- Original graphics made in Illustrator
- Analysis of the garden's symbolism

Backslash Trash

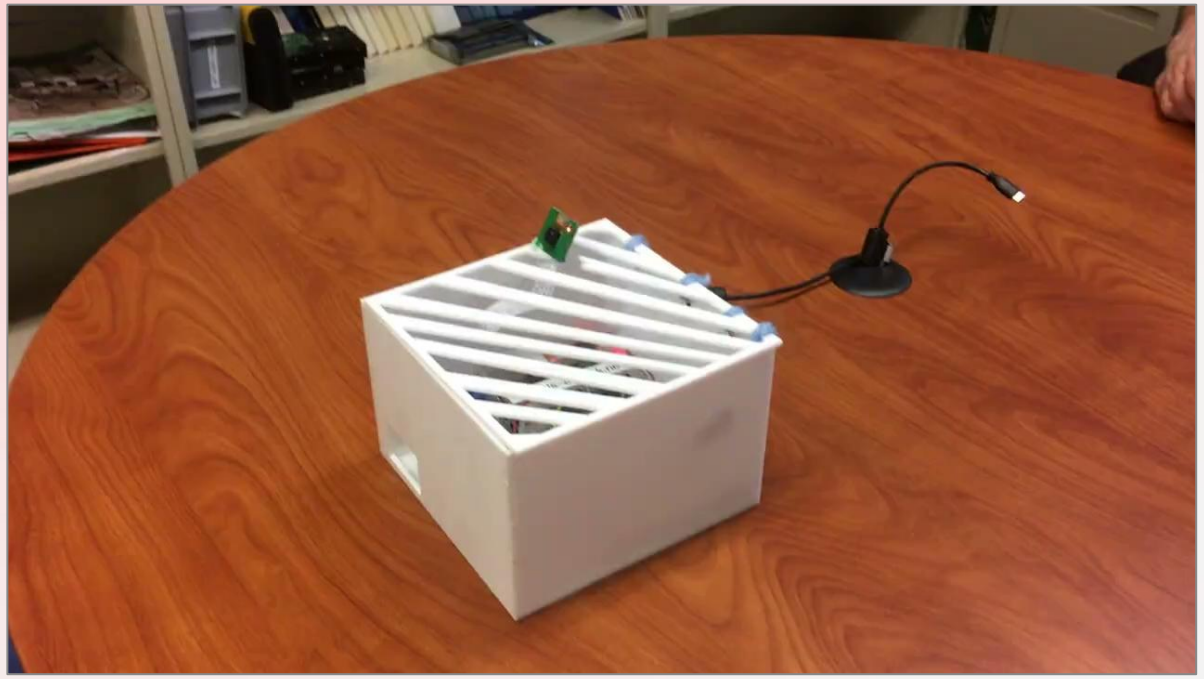

view ↗

A web app that plots locations of trash cans in Boston compared to population density, showing where to build more.

- Built with HTML, JavaScript, Python, and Google Maps API
- Extracted coordinates from dataset
- Overlaid heatmap with color code

Facial Recognition Box

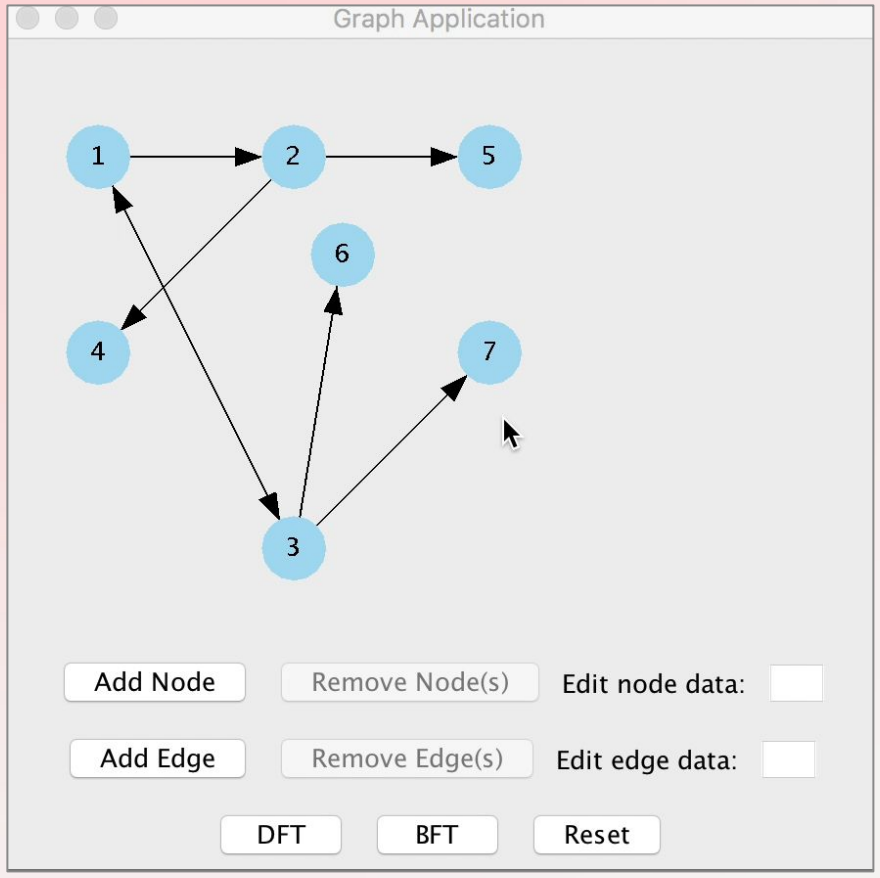

A box that unlocked when it recognized my face, built with a trained model using the OpenCV library.

- Arduino controls the box’s hinge movement
- Raspberry Pi handles the facial recognition

GraphGUI

view ↗

A graphical user interface illustrating graph behavior, with the ability to select, unselect, add, delete, and edit nodes and edges.

- Built in Java
- Nodes highlighted on hover
- Multiple deletion/selection
- Modify/view node data

Thanks!
